9. Mechanisms and Procedures for Alignment

Alignment happens at two levels, horizontal and vertical. The two levels influence each other. All levels of alignment should find an aligned expression in the final document of the Municipality.

9.1 IDP, Budget and PMS Alignment

In terms of the Municipal Systems Act, municipalities are required to prepare organisational performance management system that must be linked to the IDP. The IDP, Performance Management Systems (PMS) and Budget are all components of one overall development planning and management system. The IDP sets out what the municipality aims to accomplish, how it will do this. The PMS enables the municipality to check to what extent it is achieving its aims. The budget provides the resources that the municipality will use to achieve its aims.

9.2 Alignment with other Municipalities

Horizontal alignments are between the District and Local Municipalities which involves ensuring that their planning activities and processes are coordinated and addressed jointly different review stages will be informed and guided by priority issues, strategies and projects and programmes of other municipalities adjacent to Moretele Local and those that are within the Bojanala Platinum District Municipality. Further the District IGR Structures will be used to ensure horizontal alignment.

9.3 Alignment with other Spheres of Government

Vertical alignment is between local government and other spheres of government as well as parastatals or service providers which also ensures that the IDP is in line with national and provincial policies and strategies to even influence resource allocation of departmental budgets for local development and further to empower the municipality to contribute to National and Provincial goals and targets.

9.4 Managing the Alignment Process

For both alignment types, horizontal and vertical, the main responsibility lies with the District Municipality. The role of the IDP Manager at the District level is of utmost importance. IDP unit and external facilitators could be used to support the alignment process. However, the provincial department of local government and office of the Premier play an important role as co-coordinator to ensure alignment above District level and between districts and departments within the Province.

9.5 Risk Management

The review process will be undertaken within the risk management framework of the municipality in terms of strategic risks and operational risks. Risk management strategies fall within the categories of risk avoidance, reduction, sharing and acceptance. Avoidance responses take action to remove the activities that give rise to the risks. Reduction responses reduce the risk likelihood, impact, or both. Sharing responses reduce risk likelihood or impact by transferring or otherwise sharing a portion of the risk. Acceptance responses take no action to affect likelihood or impact because it is such a minimal risk, or the cost to implement the risk is too high relative to the cost of the risk.

10. Monitoring

The District Mayor's IGR Forum will monitor and ensure the implementation of the District IDP Framework and Moretele Local Municipality will monitor and ensure the implementation of local process plans. The Department of Local Government and Traditional affairs (Northwest) and Office of the Premier (Bokone Bophirima) will ensure support on the co-ordination and alignment of provincial and national departments.

The IDP and Planning Portfolio Committee and the Executive Committee are expected provide oversight function over the process. The Municipal Manager will be responsible for daily management and monitoring of the process to ensure a qualitative process that is delivered in terms of the timelines included herein.

11. Project Identification

Project phase will be informed and guided by the following -

- 2025/2026 IDP implementation
- Community needs analysis Meetings
- IDP Steering Committee
- Strategy and policy documents (Local, District, Provincial and national), and
- Inputs from various sectors and agencies

12. Adoption of the Process Plan, the IDP and the Budget

The plan allows for stakeholder participation but reserves the right to adopt the final process and product to the Municipal Council as constituted.

13. Cost Estimates

The IDP planning process will be largely managed internally with provision to enlist external support where a need arises or in other planning stages.
